

BOZENA ZAWILINSKA

I build software that is easier to use, easier to maintain and easier to evolve.

Front-end developer with over five years of professional experience across SaaS products, marketing websites and content-managed platforms. I turn complex requirements into accessible, reliable interfaces and reusable systems that work well for users and the teams maintaining them.

01 WHAT I BRING TO A TEAM

ACCESSIBLE INTERFACES

I consider semantic structure, keyboard behaviour, focus management and WCAG requirements throughout implementation, rather than adding accessibility at the end.

PRODUCT THINKING

I work across design, product and backend concerns, asking the questions needed to turn requirements into dependable production behaviour.

MAINTAINABLE ARCHITECTURE

I create reusable components, consistent patterns and clear abstractions that reduce duplication and make future changes easier.

CLARITY FOR THE NEXT DEVELOPER

I document important decisions, explain connected workflows and aim to leave every codebase easier to understand than I found it.

02 SELECTED IMPACT

Product development

Built and refined Vue.js features for a SaaS product, collaborating with product managers, designers, backend developers and front-end engineers from early requirements through testing and release.

Marketing enablement

Created reusable Gutenberg blocks that gave non-technical teams more control over website content while preserving design consistency and maintainability.

Performance and quality

Improved marketing-site speed through front-end optimisation, modern tooling, image and dependency review, while supporting accessibility and security improvements.

EXPERIENCE THAT SUPPORTS THE PROMISE.

03 PROFESSIONAL JOURNEY

2022 - Present

ProdPad

FRONT-END DEVELOPER

Building and improving a product-management SaaS platform and its WordPress marketing website.

- Develop reusable Vue.js components and complex product features across established and evolving front-end architecture.
- Contribute to accessible onboarding, navigation and form experiences, including keyboard interaction and focus behaviour.
- Connect front-end interfaces with backend APIs and workflow systems, handling entity data, edge cases and dependable state transitions.
- Create custom Gutenberg blocks and improve the marketing website's performance, maintainability, accessibility and security.
- Write technical documentation and clarify comments so complex workflows remain understandable to developers and AI-assisted tools.

2020 - 2022

Passion4Social

WEB / WORDPRESS DEVELOPER

Delivered bespoke, responsive websites for businesses and organisations, with accessibility, SEO and performance built into the work.

- Designed and developed custom WordPress websites and functionality using PHP, JavaScript, HTML and SCSS.
- Tested browser compatibility, responsive behaviour, performance and accessibility, including manual testing of Scottish Government digital services.
- Managed staging-to-live migrations, hosting environments and version-controlled development workflows.
- Supported and supervised junior developers while collaborating directly with clients.

2015 - 2020

Indelle

WEB DESIGNER & MARKETING ASSISTANT

Created and managed a WordPress e-commerce website, responsive campaign assets, SEO content, product photography, visual design and social media marketing.

04 BEYOND MY DAY JOB

FOUNDER & FRONT-END DEVELOPER

THE ARETÉ CLUB

I am designing and building an independent digital product while expanding my React experience. The project combines accessible UI, reusable components, editorial content architecture, SEO, performance and structured AI-assisted workflows.

05 TECHNICAL EXPERTISE

Front end	Vue.js, JavaScript, HTML5, CSS3, SCSS, responsive design, semantic HTML
WordPress	Gutenberg blocks, custom themes, PHP, ACF Pro, content systems
Quality	WCAG 2.2, performance optimisation, Core Web Vitals, Lighthouse, Cypress
Workflow	Git, GitHub, Vite, Webpack, npm, VS Code, REST APIs, JSON, Figma

EDUCATION & TRAINING

Diploma - IT and Telecommunications, SCQF Level 6

QA, May 2021 · HTML, CSS, JavaScript, ASP.NET MVC, Python 3, PHP fundamentals and SQL

JavaScript Basics & Object-Oriented Programming - Mosh, 2019

LANGUAGES

Polish - Native

English - Professional working proficiency
